

## **P.A.C.E Meeting minutes November 14, 2011p**

This was an informative meeting on the Learning and Teaching styles for the Gifted And Talented children. Different opportunities "extras" were shared from a parent perspective as well as the Gifted and Talented staff.

Below are some suggested websites on learning styles, resources and opportunities for our children. You may "Google" the key terms. I have given some sample websites also.

**Multiple intelligences.** Resource: Howard Gardner.

[http://www.thomasarmstrong.com/multiple\\_intelligences.php](http://www.thomasarmstrong.com/multiple_intelligences.php)

The theory of multiple intelligences was developed in 1983 by Dr. Howard Gardner, professor of education at Harvard University. It suggests that the traditional notion of intelligence, based on I.Q. testing, is far too limited. Instead, Dr. Gardner proposes eight different intelligences to account for a broader range of human potential in children and adults. These intelligences are:

- **Linguistic intelligence** ("word smart")
- **Logical-mathematical intelligence** ("number/reasoning smart")
- **Spatial intelligence** ("picture smart")
- **Bodily-Kinesthetic intelligence** ("body smart")
- **Musical intelligence** ("music smart")
- **Interpersonal intelligence** ("people smart")
- **Intrapersonal intelligence** ("self smart")
- **Naturalist intelligence** ("nature smart")

Online resources for teachers, students, school librarians, library automation, media booking, and statewide union catalog of K-12 school libraries

### **Think-Tac-Toe**

Think-Tac-Toe plays off the familiar childhood game. It is a simple way to give students alternative ways of exploring and expressing key ideas and using key skills.

Typically, the Think-Tac-Toe grid has nine cells in it like a Tic-Tac-Toe game. The number of rows and cells can, of course, be adjusted.

Information about learning styles and Multiple Intelligence (MI) is helpful for everyone. Knowing your learning style will help you develop coping strategies to compensate for your weaknesses and capitalize on your strengths. This page provides an explanation of what learning styles and multiple intelligence are all about, an interactive assessment of your learning style/MI, and practical tips to make your learning style work for you.
